

CS 6393 SPRING 2020 ASSIGNMENT 2
PROF. RAVI SANDHU
DUE FRIDAY MAY 15, 2020 BY MIDNIGHT CENTRAL

- The same question applies to each lecture in Part II, that is the six lectures numbered 8 through 13. As such this is a 6-part assignment. The answer must be submitted as a single submission.
- The question pertains to the PowerPoint of each lecture and to the supporting readings. There should be no need to consult material outside the lecture and provided readings. All the same, students can consult whatever material they choose. However, there should be no discussion with anyone, including other students in this class, students beyond this class, co-workers and faculty. This is different from the rules specified for Assignment 1. Discussion with me is permitted.
- The answer must be written in the student's own words without assistance from anyone else. Any verbatim content from any other source must be clearly identified as a quote with source identified. Failure to cite a source is an act of academic misconduct.
- There is no "correct" answer.

- Discussion and mention of irrelevant issues will be penalized. Use of incorrect/sloppy English will be penalized.
- Late submissions are not practical due to final grades deadline of May 18, 2020.

For each lecture the answer has maximum half page allowance total for a and b in 11 point font single space.
Approximately equal space (i.e. quarter page each) for part a and part b.
You are not required to use the full allowance. A significantly shorter answer is likely to be inadequate.

Submission Guidelines

- Solutions are to be submitted by email in pdf to ravi.utsa@gmail.com OR ravi.sandhu@utsa.edu with
 - subject title "Assignment 2: <student name>"
 - name of attached file: "Assignment 2: < student name >.pdf"
- **Include a cover page with the following honor code statement signed by typing your name below it:**
I have not taken any help or given any help from/to anyone in the writing of my solution. I have not discussed this assignment with anyone (possibly excepting Prof. Sandhu). Any material obtained directly from another source has been clearly identified as a quote with appropriate attribution. I understand that simply rewording such material does not exempt me from this requirement.

Text must be typed. There is no need for figures in the answer.

There are 6 parts to the assignment. For each lecture 8 through 13 answer the questions a and b below. Number each part of your answer as 8a, 8b, 9a, 9b, and so on through 13a, 13b. Each lecture may have multiple parts to the posted PowerPoint. The question pertains to all these parts put together as a single lecture. For example, lecture 8 is a single lecture even though the slides are split into 2 parts.

- a. What are the 2 or 3 major lessons conveyed by this lecture?
Hint: Consider how you would answer this question to a fellow graduate student.

- b. Identify 1 important topic that was omitted from the lecture but is covered in the accompanying readings. Provide justification of why you think this topic is important and should be included in a more comprehensive lecture. Indicate where in the lecture slides this topic could have been covered (by additional slides).
